1 Introduction

1.1 Icons Used

⚠️ WARNUNG
This icon indicates a risk of injury or death. Not following these instructions may result in serious health problems including potentially fatal injuries.

⚠️ VORSICHT
This icon indicates a possibly dangerous situation. Not following these instructions may cause minor injuries or damage.

📘 HINWEIS
This icon marks instructions for proper use of the described products. Not following these instructions may cause malfunctions or damage.

💡 TIPP
This icon marks information provided for simplified use of the described products.

1.2 About this user’s manual

EN | Translation of the original instructions
All KLING & FREITAG manuals are originally authored in German.
© KLING & FREITAG GmbH, all rights reserved.

All specifications regarding the features of the described products and applicable safety guidelines provided in this manual are based on information available at the time of publishing.

We assume no responsibility for technical specifications, dimensions, weights, and properties.

All information in this manual is subject to change without notice.

To ensure safe operation, all persons using the speaker system must have access to these user’s manual and all other relevant material during installation. Ohne dieses gelesen, verstanden und griffbereit vor Ort zu haben, darf das Lautsprechersystem weder aufgebaut noch eingesetzt werden.

KLING & FREITAG spare manuals are separately available for order or can be downloaded from our website: www.kling-freitag.de

2 Product Description

2.1 Intended Use

Be sure to use the VIDA M speaker system for stationary indoors installations only. The system is not designed for repeated assembly, reconfiguration, disassembly, or transport.

**WARNUNG**
Risks imposed by falling or overturning parts

Be sure to install, suspend, fasten, and use Kling & Freitag speakers only using the designated fixtures as specified in this document. Never down-tilt speakers mechanically.

**HINWEIS**
Possible malfunctions

Never operate the speaker in an environment where the temperature exceeds 45 °C / 113 °F. Never operate the speaker in places exceeding an altitude of 2,000 meters / 6,000 ft. Make sure that the humidity is between 10% and 90%. This product is not designed for use in corrosive environments.

Potential interference with household appliances

This device is not designed for home use.

Any use not described in this User’s Guide is not an intended use.

2.2 Versions

VIDA M is available in four versions designed for different applications and transmission ranges.

**VIDA M 110**
- Asymmetrical design
- Transmission range: approx. 20 meters
- Height: 1.1 meters

**VIDA M 110 S**
- Symmetrical design
- Transmission range: approx. 25 meters
- Height: 1.1 meters

**VIDA M 220**
- Asymmetrical design
- Transmission range: approx. 30 meters
- Height: 2.2 meters

**VIDA M 220 S**
- Symmetrical design
- Transmission range: approx. 32 meters
- Height: 2.2 meters
2.3 System requirements

- Mounting hardware
- Computer running Windows 8, 8.1, or 10
- VIDA App
  The VIDA App required for setting up the speaker system is freely available at the Windows Store.
  For this purpose, visit the Microsoft App Store and search for VIDA App.
  For more information, refer to the VIDA App User’s Manual, which is available for download at our website.
  www.kling-freitag.de
- Audio source connected to Analog, AES 3, or Dante.

2.4 Items Included

2.4.1 Items Included VIDA M 110 / 110 S

- VIDA M 110 / 110 S speaker (1 piece)
- Counterbore caps (12 pieces)
- Sealing plate for the connector panel (1 piece)
- Countersunk screw M4x10 for fixing the sealing plate (7 pieces)
- 3-pin power connector (1 piece)
- 9-pin audio-in connector (1 piece)
- 15-pin GPIO connector (1 piece)
- Cable tie (3 pieces)
- Loctite 2400 (5 ml)
- User’s manual (1 piece)

2.4.2 Items Included VIDA M 220 / 220 S

- Passive module for VIDA M 220 or VIDA M 220 S (1 piece)
- Active module for VIDA M 220 or VIDA M 220 S (1 piece)
- Mounting plate for fastening the modules (2 pieces)
- Countersunk screw M6x10 for fastening the modules (12 pieces)
- Counterbore caps (12 pieces)
- Sealing plate for the active-module connector panel (1 piece)
- Sealing plate for the passive-module connector panel (1 piece)
- Countersunk screw M4x10 for fastening the sealing plates (14 pieces)
- 3-pin power connector (1 piece)
- 9-pin audio-in connector (1 piece)
- 15-pin GPIO connector (1 piece)
- Cable tie (3 pieces)
- Loctite 2400 (5 ml)
- User’s manual (1 piece)
### 2.5 Overview of VIDA M 110 / 110 S Parts

[A] Inlet for connecting mounting hardware (also available at the bottom)

[B] Bores for fastening mounting hardware. Can be sealed using the supplied caps when not in use.

[C] Connector panel

[D] Sealing plate for connector panel

[E] Screws for fastening the sealing plate:
   - 7 x Countersunk screw M4x10, hexagon socket wrench IS2,5 (7 pieces)
2.6 Overview of VIDA M 220 / 220 S Parts

[A] Passive module
[B] Inlet for connecting mounting hardware (bottom inlet for connecting the active module)
[C] Bores for fastening mounting hardware. Can be sealed using the supplied caps when not in use. Use the bores at the bottom for connection with the active module [H].
[D] Connector panel for fastening the active module
[E] Sealing plate for the passive-module connector panel
[F] Screws for fastening the sealing plate:
   7 x Countersunk screw M4x10, hexagon socket wrench IH2.5
[G] Fastener for connecting the passive module to the active module

[H] Active module
[I] Cable with connectors and grommets for connecting the passive module. The VIDA M 220 has only one single cable!
[J] Inlet for connecting to the passive module (inlet at the bottom is for fastening mounting hardware)
[K] Bores for fastening the active module [A]. The bores at the bottom are for fastening mounting hardware. Can be sealed using the supplied caps when not in use.
[L] Connector panel
[M] Sealing plate for the active-module connector panel
[N] Screws for fastening the sealing plate:
   7 x Countersunk screw M4x10, hexagon socket wrench IH2.5
2.7 Front-panel indicator

Each VIDA M features an LED indicator located behind the front grille. You can turn the LED on and off using the VIDA App in order to identify a specific VIDA M speaker.

The indicator color shows the following statuses:

- Power-up (blue): The speaker is being powered up and will be ready for operation shortly.
- Beam error (red-lit): The speaker has been powered up successfully and is ready for operation; however, the sound-ray setup needs to be checked.
- Identification (green): The speaker is part of the selected speaker group.
- Error (flashing red and green): Configuration error. Perform a firmware update. See chapter »Firmware Update«, page 34.
2.8 Accessories

VIDA M wall bracket

VIDA M flying frame

VIDA M adapter,
suitable for VIDA M 110 / 110 S
2.9 Dimensions

2.9.1 Dimensions VIDA M 110 / 110 S

150 mm [5.906 inch]

1083 mm [42.638 inch]

133 mm [5.226 inch]
2.9.2 Dimensions VIDA M 220 / 220 S

- Height: 2167.5 mm (85.335 inch)
- Width: 150 mm [5.906 inch]
- Width: 133 mm [5.226 inch]

3 General Safety Instructions

**WARNING**

**Risk of electric shock**
- The system must be connected to the mains by a qualified electrician only.
- Make sure that the power outlet has a ground connector and it is connected to the device through the PE conductor of the power cord!
- Always route power cords so that they are protected from damage caused by stepping on it, tensile stress, or getting caught.
- All equipment interconnected through signal cables must be connected to common ground. Failing to do so may result in an electric shock or permanent damage to the connected equipment.

**Risk of electric shock and falling parts**
- Never perform any maintenance work on the equipment other than what is described in these user’s manual.
- Repair work must be carried out by qualified service personnel authorized by KLING & FREITAG.

**Risks imposed by falling or overturning parts**
- To be installed by qualified personnel only.
- Be sure to install, suspend, fasten, and use KLING & FREITAG speakers only using the designated mounting hardware as specified in this document.
- Observe the safety instructions in the User’s Manuals to the respective mounting hardware.
- Unless otherwise stated, use only KLING & FREITAG original parts for mounting the speakers.
- Dieses Lautsprechersystem darf nicht mechanisch geneigt werden.
- Never try removing the individual modules of VIDA M 220 / 220 S speakers after these have been joined, screwed, and glued together during initial installation.

**Danger of fire**
- The device does not include a master fuse. Be sure to protect the supply line appropriately (230 V: 16 A fuse max.; 115 V: 20 A fuse max.)!
- Also make sure the supply line has an appropriately dimensioned cable cross-section.

**VORSICHT**

**Risk due to high volumes**
This equipment is capable of delivering sound pressure levels in excess of 90dB SPL, which may cause permanent hearing damage. Keep your distance from operating speakers.

**HINWEIS**

**Possible malfunctions**
- RF interference at the power cord or line cables may result in unwanted noise.
4 Initial installation of VIDA M 220 / 220 S modules

VIDA M 220 / 220 S systems are disassembled for shipping and therefore need to be assembled for initial installation.

**WARNUNG**
Risks imposed by falling parts
Never try removing the individual modules of VIDA M 220 / 220 S speakers once these have been joined, screwed, and glued together during initial installation.

<table>
<thead>
<tr>
<th>Required Tools</th>
<th>Required mounting material</th>
</tr>
</thead>
<tbody>
<tr>
<td>hexagon socket wrench IH4</td>
<td>Loctite 2400 (supplied)</td>

</tr>
</tbody>
</table>

1. Slide the joint pieces [A] halfway into the passive-module inlets.
2. Apply Loctite 2400 to the threads of the M6x10 countersunk screws [B].
3. Screw in all M6x10 screws [B] using an IH4 hexagon socket wrench. Do not tighten yet!
4. Loosen the M4x10 countersunk screws [C] using an IH2.5 hexagon socket wrench and remove the sealing plate [D].
5. Slide the active module [E] onto the passive module [F].
6. Route the cables with their connectors [G] through the appropriate cable openings [H] of the passive module. The VIDA M 220 has only one single cable!
7. Press the grommets [G] into the cable openings to seal the housing. Make sure you can hear the grommets snap into place.
8. Apply Loctite 2400 to the threads of the M6x10 countersunk screws [I] to be used for fastening the active module.
9. Tighten the M6x10 screws [I] to a 3 Nm torque using an IH4 hexagon socket wrench.
10. Next, tighten the M6x10 screws of the passive module [B] (see above figure) to a 3 Nm torque.
VIDA M 220

11. Plug in the connector as shown. The connecting-cable label matches the terminal label.

[A] MT 1

The remaining terminals will stay unoccupied.

Tipp

Use a pair of bent needle-nose pliers to complete the following steps:

VIDA M 220 S

12. Make the connections as shown. The connecting-cable labels match their respective terminal labels.

[A] MT 2, unoccupied
[B] MT 1
[C] HT 1A
[D] HT 1B
[E] HT 2B
[F] HT 2A
13. Place the sealing plate.
14. Tighten the M4x10 screws using an IH2.5 hexagon socket wrench.
5 Wiring

Wire the speaker as described below.

5.1 Terminal positions and purpose

[A] Netzanschluss, 100 V bis 240 V AC
[B] Fuse (250 V, 8 A, slow blow)
[C] Sealing power-cable gland and strain relief
[D] Dante/remote secondary (RJ45)
[E] Dante/remote primary (RJ45)
[F] Audio terminals
inputs: analog, AES 3, output (AUX): analog (LINE OUT)
[G] GPIO terminals

5.2 Kardioid

5.2.1 AC power inlet

WARNUNG
Risk of electric shock
The system must be connected to the mains by a qualified electrician only.

[A] PE conductor
[B] N conductor (neutral)
[C] L conductor (phase)

## 6 GPIO specifications

### 6.1 GPI

#### GPI A1 – A3:

<table>
<thead>
<tr>
<th>Type</th>
<th>Floating optocoupler inputs</th>
</tr>
</thead>
<tbody>
<tr>
<td>Power consumption</td>
<td>2.5 mA @10 V</td>
</tr>
<tr>
<td>Internal voltage supply(^a)</td>
<td>12 V/1 mA, floating</td>
</tr>
<tr>
<td>Reverse voltage</td>
<td>–6 V</td>
</tr>
<tr>
<td>HIGH switching threshold</td>
<td>Edge-triggered: 5 V (min.) – 30 V (max.)</td>
</tr>
<tr>
<td>LOW switching threshold</td>
<td>Edge-triggered: –6 V (min.) – 1.5 V (max.)</td>
</tr>
</tbody>
</table>

\(^a\) If galvanic isolation is required, be sure to use an external voltage source!

#### GPI prio / mute:

<table>
<thead>
<tr>
<th>Type</th>
<th>Floating optocoupler inputs</th>
</tr>
</thead>
<tbody>
<tr>
<td>Power consumption</td>
<td>2.5 mA @10 V</td>
</tr>
<tr>
<td>Internal voltage supply(^a)</td>
<td>12 V/1 mA, floating</td>
</tr>
<tr>
<td>Reverse voltage</td>
<td>–6 V</td>
</tr>
<tr>
<td>HIGH switching threshold</td>
<td>Voltage controlled: 5 V (min.) – 30 V (max.)</td>
</tr>
<tr>
<td>LOW switching threshold</td>
<td>Voltage controlled: –6 V (min.) – 1.5 V (max.)</td>
</tr>
<tr>
<td>GPI PRIO function</td>
<td>Input selection</td>
</tr>
<tr>
<td>GPI MUTE function</td>
<td>Mute</td>
</tr>
</tbody>
</table>

\(^a\) If galvanic isolation is required, be sure to use an external voltage source!
6.1.1 GPI internal wiring:

![Diagram of GPI internal wiring]
### 6.2 GPO

<table>
<thead>
<tr>
<th>Type</th>
<th>Floating MOFSET switches</th>
</tr>
</thead>
<tbody>
<tr>
<td>Max. Continuous current</td>
<td>0.5 A</td>
</tr>
<tr>
<td>Max. Peak current</td>
<td>1.5 A</td>
</tr>
<tr>
<td>Max. Peak voltage</td>
<td>60 VAC</td>
</tr>
<tr>
<td>NO1 / NO2</td>
<td>Normally open, low impedance to COMMON</td>
</tr>
<tr>
<td>NC1 / NC2</td>
<td>Normally closed, high impedance to COMMON</td>
</tr>
<tr>
<td>M1 / M2</td>
<td>COMMON</td>
</tr>
</tbody>
</table>

**GPO internal wiring:**

- **GPO 1 / GPO 2 = HIGH**
  - M1 / M2
  - NO1 / NO2: NO = Normally Open
  - NC1 / NC2: NC = Normally Closed
- **GPO 1 / GPO 2 = LOW**
  - M1 / M2
  - NO1 / NO2: NO = Normally Open
  - NC1 / NC2: NC = Normally Closed

- GPO 1 / GPO 2 is high, status is OK
- NO1 / NO2 is low-impedance to COMMON
- GPO 1 / GPO 2 is low, status is ERROR
- NO1 / NO2 is high-impedance to COMMON
7 System latency

The following table lists the systems latency that is to be expected of the VIDA M. These values are true for the firmware version 1.1.0 and without using beamsteering.

<table>
<thead>
<tr>
<th>Input</th>
<th>K&amp;F VIDA M</th>
<th>AUX OUT</th>
</tr>
</thead>
<tbody>
<tr>
<td>Analog</td>
<td>6.016 ms</td>
<td>1.260 ms</td>
</tr>
<tr>
<td>AES 44.1 kHz</td>
<td>8.299 ms</td>
<td>3.537 ms</td>
</tr>
<tr>
<td>AES 48.1 kHz</td>
<td>8.062 ms</td>
<td>3.313 ms</td>
</tr>
<tr>
<td>AES 88.2 kHz</td>
<td>7.302 ms</td>
<td>2.540 ms</td>
</tr>
<tr>
<td>AES 96 kHz</td>
<td>7.208 ms</td>
<td>2.448 ms</td>
</tr>
<tr>
<td>AES 176.4 kHz</td>
<td>6.830 ms</td>
<td>2.046 ms</td>
</tr>
<tr>
<td>AES 192 kHz</td>
<td>6.760 ms</td>
<td>2.000 ms</td>
</tr>
<tr>
<td>DANTE</td>
<td>n.a.</td>
<td>n.a.</td>
</tr>
</tbody>
</table>

When using system amplifiers such as the K&F PLM+ series with the AUX OUT, additional delay will be added due to the amps signal processing. For this reason, the AUX OUT has the least amount of delay possible, which leaves room to be adjusted via the VIDA APP.

7.1 Dante latency

The latency for the DANTE playback results from the setup for the DANTE network and the

7.1.1 Example

DANTE controller setup: latency = 0.5 ms, sample rate = 96 kHz
Total latency = 7.208 ms (AES 96 kHz) + 0.5 ms (DANTE) = 7.708 ms

By factory default, the two network ports of the VIDA M are configured for redundant operation. This way, you can route a signal through Dante and two separate cable runs in order to increase fail-safety.

If necessary, you can change the two ports to the ‘Switched’ mode using the Dante Controller software. This way, you can route control data and the Dante signal from one speaker to the next. (This is referred to as daisy-chaining.) In this case, you cannot achieve a redundant configuration.
7.1.2 Changing between Dante redundancy operating modes

1. Launch Dante Controller.
2. Double-click the VIDA M to be configured to access the Device View.
3. Click the Network Config tab.
4. Make the appropriate settings in the Dante Redundancy section.

7.1.3 Setting up Dante latency with an additional hop

There is one additional network switch installed inside K&F VIDA M which translates to one additional hop for the network. Be sure to note this when setting up the Dante latency.
For more information about setup and design of a Dante audio network and the necessary www.audinate.com/resources
8 Initial Operation

1. Download the VIDA App from the Microsoft Store and install it. For this purpose, visit the Microsoft App Store and search for VIDA App.

3. Wire the speaker as previously described. See chapter »Wiring« on page 24.

4. Connect the power supply.

5. Add the speakers to your network.

6. Run the VIDA App on your computer. At program launch, the Setup screen will be displayed.
   • By default, the Offline Device is always displayed at the top left corner. Using that device, you can configure settings without physically connecting a speaker. This means you can create and store “virtual setups” that you can later apply onto your physical speakers. To configure Offline Devices, press the button on the right-hand side to select the desired speaker type and number.
   • The Offline Device will list all accessible VIDA speakers and arrays.
   • While the VIDA App is uploading the settings to the speakers found, green progress bars will show the upload status for each system.

   ![Image showing the Offline Device interface]

   • At first use, a red dot appears next to the speaker. In addition, the front LED will light red. This means that no valid preset could be uploaded, so the speaker is not ready for operation.

   ![Image showing the Offline Device interface with a selected device]

   • In this case, change to the Beam tab.
   • Press the Presets button in the bottom right corner.
   • Load a setup.

   If you just want to perform a function check, the Default setup will do. Note that this preset is for performing function checks only—it is not suitable for sound adjustment.
7. To check, change to the Setup tab.
   • When the progress bar is fully displayed and no red dot is shown, the speaker is ready for operation.

8. For details on speaker configuration and operation, refer to the VIDA App User’s Manual.

9. Output a low-volume signal to the system.

10. Check to see if the desired signals are applied to the intended speakers and make sure there is no interference.
    • A red progress bar indicates that the speaker has received damaged data packets, or no data packets at all. In this case, make sure you are within the WLAN service area, are connected to the correct WLAN, and no other network-related problems exist.
9 Updates

9.1 Firmware Update

1. Connect the speakers to the mains.
2. Add the speakers to your network.
3. Download the VIDA Firmware Updater from our website (www.kling-freitag.de).
4. Unzip the file and run the executable.
5. Wait a moment until the software has found the speakers on the network and has selected the current firmware on the K&F server.
6. Compare the version numbers of the current firmware (“Build Info”) on the server with the installed speaker firmware.
7. If the firmware version installed on the speaker is lower than the version number on the K&F server, perform a firmware update.
8. Follow the instructions in the Quick Start Guide included in the ZIP file of the VIDA Firmware Updater.
9.2 Dante Update

1. Connect the speakers to the mains.
2. Add the speakers to your network.
3. If the Dante Controller application is already installed, proceed to step 10.
5. Select your operating system.
6. Click the Dante Controller v… button.
7. Select I need to create an account to create a new account, or click I have an account to log in using your existing credentials.
8. Click Downloadfile: Dante Controller-….exe and save the file.
9. Launch the saved executable and follow the installation instructions.
10. Run the Dante Controller program.
11. To launch the Dante updater, click the button.
   OR: Select View > Dante Updater or press CTRL+U.
12. Open the UPDATES AVAILABLE menu.
13. Select the checkboxes of those speakers you want to update.
14. Click UPDATE SELECTED DEVICES.
15. Select the checkbox to confirm that you understand that audio will be interrupted during the update process.
16. Click UPDATE NOW.
When the update is complete, the following dialog will be shown:

- **Device Name**: VIDA-161676
- **IP Address**: 192.168.110.123
- **Update Status**: REBOOT REQUIRED

1. Check the REBOOT REQUIRED box.
2. Click the REBOOT SELECTED DEVICES button to reboot the updated speaker(s).

## 10 Care and Maintenance

The K&F VIDA M system can exhibit signs of wear over the years, for example, from mechanical strain, transport damage, corrosion, or improper handling. Signs of wear typically indicate an increased safety risk.

In general, check the speaker and accessories for signs of wear at regular intervals.

When performing these checks, particularly look for deformations, cracks, dents, damage to threads, and corrosion. Also check slings and lifts (e.g. shackles, chains, and steel ropes) carefully for wear and deformation.

If as a result of these checks any uncertainty should arise with regard to safety or defects are found, don’t use the speaker any longer. Contact your retailer.

Inspection regulations may vary depending on application and country of use. Observe all applicable regulations; if in doubt, contact local authorities.

Many countries require regular inspection of mounting components and accessories. An additional annual inspection is typically required to be performed by a technical expert. Moreover, a legally certified or official authority must perform a detailed inspection every four years.

Therefore, be sure to maintain an inspection log. Enter the values determined for each speaker and accessory during the periodic checks into this log. This way, relevant data are always at hand in case of inspection. This inspection log book shall be updated with the inspection steps, test intervals and parts lists.
11 Transportation and Storage

Store the product in a dry place. Also, transport under dry conditions only.
During prolonged storage, ensure sufficient ventilation.
Avoid vibrations during transport.
Avoid mechanical stress during transport and storage, so the product is not damaged.

12 Disposal

This symbol on the electronic equipment indicates that the product must not be disposed of with household waste.

12.1 Germany

Don’t dispose of waste electrical equipment through household waste. All KLING & FREITAG products are plain business-to-business (B2B) products. Don’t deliver it to official recycling points either.
KLING & FREITAG GmbH is exclusively responsible for disposing of all KLING & FREITAG waste equipment marked with a crossed-out garbage-can icon. Please call the below phone number when you have a KLING & FREITAG product for disposal. We will offer you a straightforward and professional disposal at no cost.
For further disposal information of KLING & FREITAG waste products, call +49 511-96 99 7-0
The WEEE registration number of KLING & FREITAG GmbH is: DE64110372.

12.2 EU, Norway, Iceland, and Liechtenstein

The local distributor (sales partner) in the respective country is responsible for complying with the national implementation of the WEEE directive.
Contact your retailer or the local authorities for information on the regulations applicable in any EU member state (except Germany).

12.3 All Other Countries

Contact your retailer or the local authorities for information on the regulations applicable in any country not listed above.
